

Template: Digital MHPSS Services

Background information:

In December 2019 the International Red Cross Red Crescent Movement implemented a [Roadmap \(2020–2023\)](#) to help strengthen the Movement’s collective response to mental health and psychosocial needs. A special focus was placed on innovative solutions for MHPSS provision such as digital services.

At the same time, the Swiss Red Cross submitted a [Digital MHPSS Pledge](#) at the international Conference of the Red Cross and Red Crescent Movement with the aim of exploring technology-empowered pathways to addressing mental health and psychosocial needs. The pledge was co-signed by the American, the Armenian and the Swedish Red Cross.

A Digital MHPSS Working Group was created to make use of the synergies of these two initiatives. With this template, this Working Group is identifying and mapping promising digital MHPSS services. The good practices will be included in a toolkit with guidelines for the development and implementation of digital MHPSS services. Your completed word document will be slightly layouted and then published as a pdf in the toolkit on the website of the IFRC PS Center. It will serve as an inspiration for others when developing new digital MHPSS. It will enable mutual learning, increasing knowledge and understanding. The current focus is on services from within the Red Cross Red Crescent Movement.

Please complete this template in English

Concept

Name / title of service	Sui App SRK
National society / organization	Swiss Red Cross
Your logo/icon	<p>Please send us the logo or an image of your service via email. We will upload it along with your template.</p> 
Person of contact incl. function	Monia Aebersold, project manager monia.aebersold@redcross.ch

<p>Short description of the digital MHPSS service / practice (max. 1000 signs)</p>	<p>The Sui app stands for “Selbsthilfe, Unterstützung, Informationen” (in English: Selfhelp, support, information”).</p> <p>The app is aimed primarily at refugees living in Switzerland. It contains 9 chapters with information about life in Switzerland: asylum procedure, residence status, family reunification, finances, housing, health care system, work / education, social integration and general health. This information is linked to low-threshold psychoeducational content and psychological exercises divided into six chapters: stress, audio exercises, sleep, chronic pain, resources and emotion regulation. The users choose topics relevant to them in their current life situation. In addition, users receive in-app support via chat in their native language from trained and supervised peer guides.</p> <p>The app will be publicly available in German and Arabic from 2024. Until the end of 2025 it be gradually released in other languages like French, English, Farsi, Ukrainian and Turkish or Tigrinya.</p>
<p>Objectives of the digital MHPSS service / practice</p>	<p>Sui provides digital psychological and psychosocial support. The main objective is an improvement of the quality of life and wellbeing of refugees with and without mental health diseases, but who are exposed to post-migratory stressors.</p> <p>Further objectives are:</p> <ul style="list-style-type: none"> - Strengthened health literacy - Improved action competence, coping skills and self-efficacy - Reduced symptom burdens in everyday life through exercises around emotion, problem and stress management - Reduced self-stigmatisation - Lowered barriers on the side of the target group to seeking professional help - Increased sense of control and security in dealing with post-migratory life stressors thanks to relevant information and referrals to existing support services
<p>Benefits for target group/s (max. 5 bullets)</p>	<ul style="list-style-type: none"> - Low-threshold and anonymous access to psychological support. The app is not recognisable from the outside as a psychological intervention at first glance thanks to the entry via integration-relevant information. - Use of simple, resource-oriented and non-stigmatising language (e.g., using terms such as stress instead of mental health diseases). - Use in native language, for free, offline, any time at any place. - Quality and relevance of the content are ensured thanks to the participatory and multidisciplinary development. - High priority is given to data protection and data security. Access to the app is password protected. Even communication with trained peers is anonymous and secure.

<p>Unique Selling Point What makes your digital MHPSS service special/relevant?</p>	<ul style="list-style-type: none"> - User-centred design: bottom-up development together with Arabic-speaking target group and local organizations. - Evidence-based: Development in collaboration with the Universities of Bern, Zurich & Freie Universität Berlin. The effectiveness of the app has been tested according to high scientific standards (RCT). - Implementation as self-guided and guided service possible: Users receive on-demand support through trained peers who have themselves a migration background, have integration-specific expertise and speak the same language as the users. - Scalability: Scalable for different target groups and contexts in and outside of Switzerland since content and structure of the platform are separated. - Sustainable open-source software: The app was built on an existing software. It will be available open-source and free of charge in the coming years. <p>Digital MHPSS-Pledge: The SRC has committed to share the innovation, technology (open source) and process development with other National Societies on the same mission.</p>
<p>Specific barriers along the way (max. 3 bullets)</p>	<ul style="list-style-type: none"> - High time and resource expenditure, feedback loops due to participatory and agile process with target group - Securing of the sustainable operation and financial security of the app - Management of expectations, schedules and understanding of target groups and different stakeholders
<p>Specific facilitators along the way (max. 3 bullets)</p>	<ul style="list-style-type: none"> - MHPSS Resolution 2 from 2019 from the RCRC movement - Strategy 2030 of the Swiss Red Cross, where mental health was set a priority - Participatory approach in development, together with target group and academia
<p>Business model, finances, donors (internal/external) who have financially contributed to the development of the MHPSS service</p>	<p>The development of the service was financed by the Swiss Red Cross Humanitarian Foundation. The operating costs for the years 2024-2025 are secured, but not the long-term operation. For this, various funding applications are being made. In particular, financial participation of the relevant federal agencies is sought. Corresponding discussions are still ongoing.</p>
<p>Experiences, user stories, quotes or</p>	<ul style="list-style-type: none"> - "In fact, I read a lot and benefited from useful information. Especially from the psychological topics, about housing and health insurance. The app is rich in information that is useful

<p>feedback from stakeholders (max. 5 bullets)</p>	<p>for anyone who wants to learn about the Swiss system. And I was happy with the accompaniment." (participant of the RCT)</p> <ul style="list-style-type: none"> - It was really nice to notice that someone is there to support you e.g. offer help, give tips. It made you feel much better and made you want to use the app even more." (participant of the RCT) - "Reading the stress chapter helped me and I learnt some exercises from it." (participant of the RCT) - "The thing that I noticed especially, is, that it's very helpful for people who have psychological pressure, have stress. That's what I noticed - lots of tips and information." (participant of the RCT)
