

## Promoting MHPSS Evidence-Building Annex 1: List of key informants

NAMES	ORGANISATION – ROLES/POSITIONS
National Societies	MHPSS and PMER representatives
Africa region NS MHPSS representative	Umar Abubakar Jiddari – Nigeria Red Cross Lindle Mathosi – Lesotho Red Cross
Asia-Pacific region NS MHPSS representatives	Charmaine Chan – Hong Kong RC Elizabeth Glorita – Timor Leste RC Sharmila Karmacharya – Nepal RC
Ali Paul	Canadian Red Cross – Senior Advisor, MHPSS/PGIE
Despina Constandinides and Linda Mpanang'ombe	Malawi Red Cross – DRC MHPSS Delegate Malawi Red Cross – First Aid and Blood Donor Recruitment Specialist
Hamed Seddighi	University of Groningen – Postdoctoral researcher Iranian Red Crescent Society – Former Deputy Managing Director in Education & Research
John Kimura	Kenya Red Cross – MHPSS focal person (interim)
Monia Aebersold	Swiss Red Cross – Project Manager
Monika Stickler & Barbara Juen	Austrian Red Cross – Head of Emergency medical services and psychosocial support Universität Innsbruck – Professor
Nelson Sanz-Cadena	Canadian Red Cross – Senior Manager, Emergency Management
Randy Ferreir	Portugal Red Cross – Psychologist
Sarah Gribbin	New Zealand Red Cross – Psychosocial Advisor
Rhiannon Hunt	Australia Red Cross – Acting National Lead, Disaster Resilience
Randy Ferreira	Portugal Red Cross – Psychologist
Undram Chinges	Mongolia Red Cross – Monitoring and Evaluation Team Leader
Psychosocial Centre	Technical Advisors and others
Arz Stephan and Ganna Goloktionova	Arz Stephan and Ganna Goloktionova

NAMES	ORGANISATION – ROLES/POSITIONS
Guleed Dualeh, Eliza Cheung, Ahlem Cheffi, Catia de Matos	PS Centre – Technical Advisors with responsibility for regions
Nana Wiedemann	PS Centre – Director
Sarah Harrison	PS Centre – Technical Advisor Team Lead
Research Centres	Research Personnel
Salim Sohani	Canadian Red Cross – Head of Health Intelligence Research and Development Unit
Ilja Ormel	Canada Red Cross, Health Intelligence Research and Development – Senior Manager
Fiona Terry and Rodolfo Rossi	ICRC Centre for Operational Research and Experience (CORE) – Head ICRC Senior Epidemiologist
Louise Baumann	Coordinator of RC3 and research assistants with the French Red Cross Foundation
Strategic	MHPSS evidence-building in (part of) the Movement
Sofia Ribeiro	IFRC Secretariat – MHPSS Officer Community Health Unit
Pia Lorentzen	IFRC Europe and Central Asia - MHPSS coordinator
Louise Kryger	Danish Red Cross – MHPSS Team Leader
Sarah Davidson	British Red Cross – Head of Psychosocial and Mental Health Team & Co-lead of MHPSS Research Network
Prednison Morales	Co-coordinator, Asia-Pacific MHPSS Collaborative
Bhava Poudyal	ICRC - Regional MHPSS Specialist
Marianne Petri Kristensen	Danish Red Cross International Department – Senior P-MEAL Advisor

## Promoting MHPSS Evidence-Building Annex 2: Analysis of MHPSS Roadmap survey 2019 and 2021 questions on evaluation and research

Data from respondents who reported that their organisations did not conduct MHPSS activities were removed before analysis.

### 2019 (N=163)

REGIONS	NUMBER OF RESPONSES

Other	2	4	3	6	0	0	3	0	18

## Other ways

- Information about carried out activities reflected in the reports (monthly, annual)
- Intake forms (paper)
- Biannual and annual meetings with those responsible for activities in each territory
- Baseline and end-line assessments, pre and post-tests, list of attendees' field visits
- Number of referred cases
- Regular telephone interviews, follow-up
- Mission reports
- Follow-up sessions
- Psychometric tools, self-assessment reports, and professional's appraisal and any other tools used by MENA NSs with no monitoring activity yet
- Internal routine assessments
- Visits to subsidiaries
- We have different systems for different activities
- Network meetings with government agencies, NGOs, stakeholders, and the community
- Individual interviews
- In Trauma Centers, SRC follow Swedish health care legislation, including a system for monitoring and routines for quality assurance
- Standard diagnostic tools (questionnaires)

**2021 (N=163)**

REGIONS	NUMBER OF RESPONSES

Psychometric tools (please specify which tools)	2	1	1	8	7	1	3	0	23
Other	3	2	0	5	1	0	2	0	13

Other ways include:

- Post-distribution surveys
- would be activities mentioned above but we do not have the financial means
- Monthly reports and weekly meetings within the department to discuss updates
- A way of tracking and monitoring these activities is still being developed.
- Mission reports
- Coordination meetings and their minutes
- Volunteer self-assessment
- Registration in computer applications and platforms
- There is no universal monitoring of MHPSS
- Each department has its monitoring tools and methods
- Close and frequent follow-up with the NSs, whenever requested and whenever necessary

Psychometric tools used are:

- Consultation guide, reporting and supervision sheet
- Questionnaires to assess post-traumatic stress
- Tests or psychological test
- K10, DASS21, HTQ, HSCI-25
- HADS, Job Stress Survey, etc.
- WHO5
- MAPPs (University of Zurich)
- Number of different tools used mainly in our trauma centers
- KoBo toolbox
- The Geriatric Depression Scale (GDS), Beck's Depression Inventory, Fatigue Severity Scale...
- Combination of surveys and focus groups
- ProQOL
- DASS 21, IES-R, IES-R CRIES, HADS, Hopkins, ICRC "Severity Self Report", Brief cope, WHODAS 2.0, KRISOP, PRoQOL, SQR-20, Patient Specific Functioning Scale
- DASS21, IES-R, CRIES, ICRC Africa functioning scale, BriefCope, WHODAS, Patient-specific functioning scale
- DASS 21, IES-R, IES-R CRIES, HADS, Hopkins, ICRC "Severity Self Report", Brief cope, WHODAS 2.0, KRISOP, PRoQOL, SQR-20, Patient Specific Functioning Scale
- DASS-21, and Functioning scale (local and WHO-DAS-2.0)
- WHO DAS 5, PM+ tool

- DASS-21 , ProQol , DAPS
- Pre and post questionnaires
- The pre and post questionnaire

11a. What are the reasons for why your organisation does not have a system in place to monitor your mental health and/or psychosocial support activities in your organisation? Please select all that apply:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	ICRC	IFRC	MIDDLE EAST & NORTH AFRICA	TOTAL
Lack of / limited funds	4	4	7	3	0	0	1	19
Lack of planning (e.g. not including monitoring and evaluation plans at the beginning of the project/activities)	1	3	4	3	0	0	1	12
Lack of staff who can collect data	2	2	6	2	0	0	1	13
Lack of staff who can analyse data	3	2	6	2	0	0	2	15
Lack of suitable tools	3	4	7	1	0	0	1	16
Lack of / limited technical expertise (e.g. to identify manuals, trainings, specialists)	3	1	7	2	0	0	0	13
Monitoring mental health and psychosocial support activities are not seen as a core priority for the organisation	0	0	4	1	0	0	1	6
Monitoring and evaluation is not requested	0	1	3	0	0	0	0	4
Practical monitoring and evaluation support is not provided	1	1	3	1	0	0	1	7
Legal issues (e.g. data protection and information security)	0	0	2	1	0	0	0	3
Other	0	0	0	1	0	0	0	1

Other reasons are:

- The development of the PSS is only at the beginning stages...

11b. What resources/guidance does your organisation use to monitor mental health and psychosocial support activities? Please select all that apply:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	ICRC	IFRC	MIDDLE EAST & NORTH AFRICA	TOTAL
IFRC Reference Centre for Psychosocial Support 'Monitoring and Evaluation Framework for Psychosocial Support Interventions – Toolbox / Indicator Guide'	23	10	12	26	0	5	6	28
ICRC 'Guidelines on Mental Health and Psychosocial Support'	7	14	3	19	7	4	5	59
IASC 'Common Monitoring and Evaluation Framework for Mental Health and Psychosocial Support in Emergency Settings'	4	8	5	11	0	5	5	38
IASC 'Mental Health and Psychosocial Support Assessment Guide'	2	7	5	14	0	5	3	36
WHO & UNHCR 'Assessing Mental Health and Psychosocial Needs and Resources: Toolkit for Humanitarian Settings'	4	5	2	10	0	3	4	28
IFRC 'Project/Programme Monitoring and Evaluation Guide'	7	10	6	15	0	5	3	46
None of those listed	8	5	2	7	0	0	1	23
Other	5	4	4	12	0	0	1	26

Other resources/ guidance listed are:

- Kobo system
- Documentation of health psychologists, with whom we collaborate
- We use a sheet made according to the place of the intervention
- We have just started using the IFRC tool kit and we were also using REPSI guidelines
- PSP-SPS -STRESS ET LE TRAUMA
- Protocol built for the national society - we follow the Jamaica Red Cross guidance material
- THE NATIONAL SOCIETY'S PROGRAMME IS AN 'AD HOC' ONE. IT NEEDS FURTHER DEVELOPMENT AND CONSISTENCY.
- Guide to differentiated health care and psychosocial support in migrant populations (Spanish)
- Only use the activity reporting template, no standardized monitoring template in place.
- A variety including those accessed by other Trauma MH Services with the IRCT
- We do have some questionnaires for focus group discussion and data collection forms for beneficiaries internally used
- Guidelines prepared by the American Red Cross team after the Gujarat earthquake are referred to by volunteers
- Minimum standards of MHPSS for the recognized aid organizations and the two main churches offering spiritual welfare services in Germany

- Internal guidelines
- We adopt the above-mentioned (mainly IFRC PSS Centers and IASC) resources to the needs fitting to the programs of our NS
- General Health Questionnaire, Hoppkins Symptom Checklist, Perceived Stress Scale, WHO Well-being Index, Child and Adolescent Symptom Scale
- Depending on donors
- MHPSS is an integrated part of all our humanitarian activities and is monitored through the activities' respective systems our tools
- CEBaP: Centre for Evidence-Based Practice – We work together with universities for effect evaluation
- Resources and guidance developed with Public Health England and our internal research and evaluation team
- Internal resources and guidelines, based on the experience gained and the context in the NS and the country
- We are using a guideline on a PSS Centre developed by Psychology experts, in which guidance supervision sessions are recommended, and therefore organised, as well as narrative reports and a list of calls including detailed information based on project implementation reporting.
- Sorry, I don't know how to answer this question. I should go around all the services concerned...
- Depending on the program

The reasons that the documents listed are not used are:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	ICRC	IFRC	MIDDLE EAST & NORTH AFRICA	TOTAL
We did not know about any of these resources/guidance	2	2	-	-	-	-	-	4
We have not identified culturally appropriate resources/guidance	3	-	-	-	-	-	-	3
We have developed our own tools and guidance	1	1	1	2	-	-	1	6
We use Nationally recognised tools/guidance	1	1	1	2	-	-	-	5
Other reasons	-	1	-	3	-	-	-	4
We use other existing guidance/resources	-	-	-	-	-	-	-	-

Other reasons could be:

- Because the activities are carried out under the command of the IFRC, in Beira, often without any CVM consultation, central level.
- We have not created access to these resources at this time
- We are just about to start this activity, we trained just a few people in PSP and would like to continue to create our network of PSP group
- MHPSS is an integrated part of all our humanitarian activities and is monitored through the activities respective systems

**2023 (N=176)**

REGIONS	NUMBER OF RESPONSES
Africa	45
Americas	29
Asia Pacific	33
Europe and Central Asia	52
MENA and North Africa	14
Other (Global and IFRC PS Centre)	3

11. How do you monitor the mental health and/or psychosocial support activities your organisation is involved in? Please select all that apply:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	MIDDLE EAST & NORTH AFRICA	OTHER	TOTAL
Interviews or focus group discussions	24	9	14	32	10	3	92
Number of beneficiaries	22	23	21	43	12	3	124
Supervisor reports	27	13	8	27	11	3	89
Surveys	18	9	11	34	8	3	83
Systematic programme review or evaluations	13	10	11	27	8	3	72

Psychometric tools	4	3	3	9	4	3	26
Other	1	2	5	6	0	1	15

Some of the responses entered as 'other ways' were not actually monitoring methodologies (e.g. Publication of Monthly Newsletters; AP MHPSS Network Meetings; Regular Catch-up Calls with MHPSS Focal Persons both in NS and CCD/CDS). However, those which were relevant were:

- Coordinators organise and follow the support activities themselves. The national-level organisation (FRC) collects mainly numerical data.
- Activity Report; Data collected from Initial Damage Assessment / Single Incident Emergency Needs Assessment
- Monthly reports and meetings

Psychometric tools used are:

- DASS21 (10)
- PROQOOL (7)
- CRIES-8, -13/IES (6)
- WHODAS (6)
- SQR-20 (6)
- KAPS (6)
- PEDS (6)
- Harvard Trauma questionnaire (2)
- Beck Depression Inventory (2)
- Hopkins Symptom Checklist (2)
- Geriatric Depression Scale (2)
- Mini mental cognitive test
- IFRC PS Centre M&E for MHPSS Guide tools and IASC MHPSS in Emergencies M&E tool (includes 30+ psychometric tools). (2)
- RHS15
- Hospital anxiety and depression scale
- Maslach Burnout Inventory
- Beck Anxiety scale
- Unspecified tools tailored for specific contexts (12)

11a. What are the reasons for why your organisation does not have a system in place to monitor your mental health and/or psychosocial support activities in your organisation? Please select all that apply:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	MIDDLE EAST AND NORTH AFRICA	OTHER	TOTAL
Lack of / limited funds	7	5	6	3	1	0	22
Lack of planning (e.g. not including monitoring and evaluation plans at the beginning of the project/activities)	1	3	6	0	1	0	11
Lack of staff who can collect data	3	3	6	2	1	0	15
Lack of staff who can analyse data	5	4	5	3	1	0	18
Lack of suitable tools	2	2	4	2	1	0	11
Lack of / limited technical expertise (e.g. to identify manuals, trainings, specialists)	5	3	6	2	1	0	17
Monitoring mental health and psychosocial support activities are not seen as a core priority for the organisation	2	1	1	1	0	0	5
Monitoring and evaluation is not requested	0	1	0	0	2	0	3
Practical monitoring and evaluation support is not provided	4	2	2	1	2	0	11
Legal issues (e.g. data protection and information security)	0	0	0	0	0	0	0
Other	0	0	1	0	0	0	1

The 'other' reason was that 'NS has not implemented specific mental health/ psychological support activities yet'.

The 'other' reason was that 'NS has not implemented specific mental health/ psychological support activities yet'.

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	MIDDLE EAST AND NORTH AFRICA	OTHER	TOTAL
IFRC Reference Centre for Psychosocial Support 'Monitoring and Evaluation Framework for Psychosocial Support Interventions – Toolbox / Indicator Guide'	23	9	18	33	9	2	94
ICRC 'Guidelines on Mental Health and Psychosocial Support'	14	12	5	16	4	2	53
IASC 'Common Monitoring and Evaluation Framework for Mental Health and Psychosocial Support in Emergency Settings'	7	4	2	14	6	2	35
IASC 'Mental Health and Psychosocial Support Assessment Guide'	10	8	4	11	5	2	40
WHO & UNHCR 'Assessing Mental Health and Psychosocial Needs and Resources: Toolkit for Humanitarian Settings'	8	7	6	6	2	2	31
IFRC 'Project/Programme Monitoring and Evaluation Guide'	11	5	11	16	3	2	48
None of those listed	2	3	3	11	2	0	21
Other	7	6	1	6	3	0	23

Other resources/ guidance listed are:

- tools created/ adapted by the NS (4)
- Other resources from the UK Government and other UK agencies and universities
- National guidance(created by KNRC and government)
- MSP beta; also Canadian tools/guidance, and own tools guidance; Core Humanitarian Standard on QA
- Government Tools for funded projects
- Evaluation RUD ; RHS15 ; Ressources de la Ligue de la Santé mentale ; European Nursing care Pathways - International Classification of Functioning, Disability and Health (ICF)
- DSM 5 & ICD 10 &11
- documents from other organisations working in the field such as UNICEF, Plan International, etc.
- Children's Resilience Programme: Psychosocial support in and out of schools – Monitoring and Evaluation Toolkit
- CBPSS Manual for trainer, MHPSS in the Primary Care Guide, PFA training manual, stress management for community education sessions, and self – care session manual.
- Brochures from ICRC regarding monitoring of mental health and psychosocial support activities

- At national level, key documents from the national research and security institute
- Action plan prepared by the IRCS and UNICEF
- A tool has been prepared that adapts the Syrian context, such as the resilience guide - a guide - life skills - a guide for caregivers - awareness guides, a guide to sexual gender-based violence - a guide to solving problems

The reasons that the documents listed are not used are:

	AFRICA	AMERICAS	ASIA PACIFIC	EUROPE AND CENTRAL ASIA	MIDDLE EAST AND NORTH AFRICA	OTHER	TOTAL
We did not know about any of these resources/guidance	1	0	2	3	0	0	6
We have not identified culturally appropriate resources/guidance	0	0	1	2	0	0	3
We have developed our own tools and guidance	1	1	0	2	1	0	5
We use Nationally recognised tools/guidance	0	1	0	1	0	0	2
Other reasons	0	1	0	3	1	0	5

Other reasons could be:

- Usually the guidance is proposed by the UNICEF
- We use a Kobo formula, which is aligned with the reference mark. Allows you to recognize population data, requirements, considerations and psychological and social risk factors related to the codes Z of the CIE-10.
- Our MHPSS system is strongly linked to the rescue service.
- NS has a lack of trained staff to use these guidance and tools

Health (MHPSS) Coordinator is just appointed. This position was not covered more than 6-7 years.

## Research described includes

### 2019

#### *Africa*

- In Salamat province with IOM
- Identification and referral of people with mental illnesses Participation in the Mental Health Congress in 2019
- Americas
- CRC funded research projects on pediatric and adult resilience in disaster; Pathways to Wellness research in Indigenous communities In the implementation of the EPP Manual in conjunction with the reference center of the federation
- Presentation of papers in National and International Congresses on Disasters and Mental Health Mental Health Program of the Ministry
- Protocolo SMAP
- SI CON EL CREPD
- We are part of the mental health technical working group from the MoH

#### *Asia Pacific*

- User Choice Report, co-design work in community programs International research for doctoral degree
- An Assessment of the Mental Health and Psychosocial Status and Needs of Earthquake-Affected Communities in Rasuwa, Nuwakot, and Makwanpur Districts
- Development of referral pathway for survivor of domestic violence, and the Minimum Standard for working with survivor together with the Social welfare

#### *Europe & Central Asia*

- with University
- CRC was involved in PSS research with Department of psychology, Faculty of Humanities and Social Sciences after severe floods in Croatia 2014 Study of Self protection with children
- University students doing their studies
- through EU funded projects (e.g. DRIVER+)
- monitoring, surveys of pss activities on the ground (2017). Research on migrant people about pss (2016).
- RCSK provides beneficiaries' stories or interviews for research work
- in the research from University of Innsbruck PFA/CE Project funded by EU vulnerable children and youth
- Mental health of migrants Various university investigations

- Cooperation with Red Cross university college i.e. conducting research on Migrants newly settled in Sweden mental health
- The academicians have been conducting several thesis in our community centers on various topics. Those researches have not yet been released yet Various research focussing on services and populations

### *ICRC*

a) MHPSS to families of missing persons in Sri Lanka; b) MHPSS to HIV and TB patients in detention facilities in Kyrgyzstan; MHPSS to survivors of sexual violence in DRC; MHPSS to families of missing persons in Nepal

### *IFRC*

- Research of Mental Health of migrants in Serbia conducted in 2018-2019
- We currently engage in five large research projects and we coordinate and host the RCRC research network on MHPSS

## **2021**

### *Africa*

- Ethiopian Red Cross involved in MHPSS research done by Danish Institute for International Studies 'No Place For Me Here' The challenges of Ethiopian male return migrants and UK Research & Innovation Global Challenges Research Fund (GCRF) Migration and Displacement: Roots of Vulnerability, Roads to Solutions
- Community assessment to understand community coping strategies regarding Covid 19
- psychosocial support
- participation of the CRN in the congress on the mental health of African societies whenever any kind of partnership is requested
- Suicide and domestic violence
- In 2014, identification and referencing of 51 people in MS pathologies.
- Research on GPFA

### *Americas*

- impact assessment
- With the reference center Mental health effects of covid19

- Training of volunteers of the elderly and others
- Impact of covid on mental health- Humanitarian Observatory

### *Asia Pacific*

- *Beyond Bushfires research by University of Melbourne*

### *Europe and Central Asia*

- Jointly with ICRC in order to reveal the level of anxiety and depression among staff and volunteers. During Covid response under National health Institute
- Research on PSS services provided for homeless and former prisoners. Targeting health care workers during the current COVID-19 pandemic
- Research in the field of trauma; impact of mental health on migrants and refugees; validation of a mental health screening tool; validation of a psychological first aid program for children; risk perception
- socio-anthropological research on certain projects, particularly in Africa THE impact of Covid 19 on older people and care workers
- We do our own research: several services are reviewed by universities, including: Life Skills program (Radboud university), Support for survivors of Human Trafficking (Free University Amsterdam)
- Psychological Effects of Pandemic on Migrants Diagnosed Covid19, Status of Health Access of Migrants Diagnosed with Covid19 in Turkey. cooperation with Bern univercity for digital MHPSS
- SRC University college trauma reaserch
- Our research focus is manly related to aging population including the mental health of informal carers, we as well done some work around mental health of migrants.
- dont know the specifics
- We strive to scientifically substantiate our activities according to the principles of evidence-based practice. This involves both primary and secondary research. Ex. develop systematic reviews, develop evidence-based guidelines. FAMP pilots were also subjected to a randomized controlled trial.
- Considering the MHPSS needs of different groups following different forms of crises and the impacts of MHPSS resources on different groups Together with Movement partners though we are lacking the contact with the local research partners
- ‘- Vicarious traumatization and resilience in disaster response teams 2017 – City Red Cross of Skopje under RCNM - Early identification of cognitive changes, 2020 – “Early care and detection of early symptoms of detection) City Red Cross of Skopje under RCNM (conducted by 4 psychologists, 1 medicinal psychology – researchers – 100 persons)

## *ICRC*

- on various topics
- on various topics
- on various topics
- We have M&E systems in place that feeds operational research evaluation reports for programs

## *IFRC*

- well-being and resilience in students
- pandemic fatigue research (AP); Engaged in multiple HORIZON 2020 EU Research initiatives plus leading one consortium initiative, Board member of the MHPSS Research Prioritisation Exercise under the IASC RG, Board member on the University of Virginia Effectiveness of PSS Review (PS Centre); bienestar y resiliencia en estudiantes (Americas); in 2018-2019 supported and facilitated: Advocacy Field Research: "Mental health of refugees and migrants"
- conducted by Serbia RC, Research "Access of migrants to Health and Care services in Balkan countries" in cooperation with Healthcare Leadership and Management Development Institute and WHO Collaborative Center on Migrants Health (Europe).
- Pandemic Fatigue research
- in 2018-2019 IFRC supported and facilitated the following researches: Advocacy Field Research: "Mental health of refugees and migrants" conducted by Serbia RC, Research "Access of migrants to Health and Care services in Balkan countries" in cooperation with Healthcare Leadership and Management Development Institute and WHO Collaborative Center on Migrants Health

## *Middle East and North Africa*

The impact of COVID-19 on the mental health of refugees and migrants The impact of COVID-19 on the mental health of areas without mental health services

## 2023

### *Africa*

- Survey on adolescents' perception of their well-being in Mali.
- Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence)
- We participated in the Digital MHPSS by IFRC

### *Americas*

- An investigation was carried out with the reference center
- funding for formal action-oriented research previously and ongoing; evaluation for MHPSS in recovery; Mental Health and Climate Change and mental health in migration as priority research areas identified.
- Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence) Zika, Covid response
- All research is carried out together with the Humanitarian Observatory

### *Asia Pacific*

- Bangladesh University of Health Sciences on Diabetes Distress Assessment on Rohingya Community
- In collaboration with universities, partners and as part of external program evaluation and improvement. Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence)
- Stress assessment for deployed volunteers on earthquake during Covid 19 Pandemic
- Supporting in-country research of Indonesian Red Cross, Initiating Baseline Survey for Capacity Needs of National Societies, and Youth Mental Health Research
- To explain more precisely, JRCS is not involved in research but in 2022 "Japanese Red Cross College of Nursing Disaster Management Research institute was launched more academic research on JRCS MHPSS activities will be expanded.

### *Europe and Central Asia*

- Conducting research studies, publishing in scientific journals Drafting research project on CB MHPSS

- e.g. project PsychoKat, projekt KiKat, project integrated in flooding evaluation process e-mental health
- IMS, sustainability study, needs assessment is planned
- In the frames of the "Who Cares (Increasing Knowledge and Partnerships on Mental Health and Psychosocial Support for Helpers in Pandemics and Conflicts)" project – exploring stressors, resources and best-practice examples for adequate psychosocial support; analyzing the status quo in the partner countries and identify target groups and their specific needs in MHPSS.
- Lead by Swedish RC University College and involves staff at treatmentcenter MHPSS Evaluation research has been done by the Uiversity of Illinois partnership with the University of Innsbruck
- Radboud University on unintended consequences of PSS program Research for early signs of Dementia in older adults
- Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence) Mental health in refugees
- The respective research in previous years
- Various pieces of research focussed on evaluations, advocacy and awareness raising.
- We have an analysis and research team at HQ that provides reports and analysis. The last few years we have for examples had reports about the needs and worries of people that have been subject to torture; elderly people living in institutions; children with parents that have metal health issues; and prisoners (about the practise of isolation).
- We have our own research centre for Evidence-Based Practice
- we provide research information for relevant institutions such as universities and public institutions, also collected the data on MHPSS needs of different vulnerable groups from NGOs providing services and support
- wellbeing of the elderly; needs assessment for migrants
- Within IPP project, survey to identify MHPPS challenges of Covid-related frontlines

#### *Europe and Central Asia*

- comparative researches and knowledge sharing have been done
- Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence)

#### *Other*

PSC - MHPSS & Climate Crisis ?Climate Minds? consortium project with Climate Centre & LSE University ? covers all IFRC regions; Consortium partner in HORIZON Europe research projects (Refuge-Ed, STRENGTHS); Research consortium lead in HORIZON Europe research project: FOCUS; Consortium lead in Integrated Model of Supervision research project (Bangladesh, Ukraine, Jordan & Afghanistan); lead on PFA Implementation stud y review for IFRC Ukraine Appeal (Montenegro, Lithuania, Bulgaria and Slovakia); and U-RISE (WHO led EU project on MH of Ukrainian refugees); AP - Supporting in-country research of Indonesian Red Cross, Initiating Baseline Survey for Capacity Needs of National Societies, and Youth Mental Health Research

Research is encouraged, focus on ICRC target populations (weapon wounded, missing, victims of violence)

## Promoting MHPSS Evidence-Building Annex 3: Examples of research collaborations involving the IFRC Psychosocial Centre

**WHO low intensity psychological interventions:** The PS Centre has engaged in several research projects and collaborations with universities, the WHO, large international NGOs and smaller local NGOs to support the development, adaptation and field testing of 'low intensity psychological interventions' developed by the WHO. The purpose of the PS Centre involvement was to investigate how the interventions could be used by NSs to address general psychosocial ill-being and to alleviate, treat and prevent common mental disorders such as anxiety, depression, and posttraumatic stress disorder.

For example, the STRENGTHS project (2017-2021) trained Syrian refugees to provide the WHO mental health intervention, Problem Management Plus (PM+) to fellow Syrian refugees. Together with consortium partners, the PS Centre delivered the culturally adapted version of the intervention and designed and delivered the training of trainers module, as well as contributing to communication and advocacy work related to the global uptake of interventions. The expertise built through involvement in this project was intended to strengthen the capacity of NSs to adapt the intervention to local settings and thereby provide quality, research-based MHPSS services.

As another example of involvement in development of WHO low-intensity, psychological interventions, the RE-DEFINE project (2018-2020) sought to provide evidence for SelfHelp+, a preventative psychosocial intervention for people affected by humanitarian emergencies. The PS Centre supported the dissemination aspect of the project.

*FOCUS:* The PS Centre led the consortium working on the FOCUS project (Forced Displacement and refugee- host community solidarity) (2019-2022). The aim was to impact on both research and practice by understanding and improving the dynamics of integration for migrants and host communities with a special emphasis on how psychological and social factors influence integration. The project aimed to provide effective, evidence-based solutions for integration of refugees into host communities. In order to ensure that the guidance resulting from the project was practically useful, NS representatives were invited to collaborate in its design. The main output was a practical implementation guide to dynamic integration based the expertise, ideas and experiences of practitioners. The project also helped to strengthen the partnership with IOM MHPSS's Global team and IFRC's work on migration in general, including informing discussions with the EU Commission conducted by the IFRC EU Brussels delegation office.

*CONTEXT PhD Studentships:* The Collaborative Network for Training and EXcellence in psychoTraumatology (CONTEXT) is a three-year doctoral training programme. It is an international, interdisciplinary collaboration between nine European partner organisations in the academic, non-governmental, voluntary, and public sectors. The PS Centre hosted two PhD students registered with Trinity Centre for Global Mental Health; one worked with the Sudanese Red Crescent on a project designed to strengthen managerial practices to ensure the wellbeing of volunteers, whilst the other worked with the Colombia Red Cross to evaluate the effectiveness of the PM+ low-intensity psychological intervention described above. These projects resulted in increased awareness and attention to caring for volunteers and low-intensity psychological interventions – particularly helping frame the PS Centre's engagement in the STRENGTHS project. The focus on caring for volunteers built upon previous research work that led to the development of guidelines for NSs on how to work with spontaneous volunteers. These guidelines have also been incorporated into the MHPSS in National Emergencies training curriculum from the PS Centre and the Baltic Sea Programme covering NSs around the Baltic Sea.

*Integrated Model for Supervision:* The IMS research project has been ongoing since 2021, in collaboration with Trinity Centre for Global Mental Health and funded by USAID. The intention is that the model and associated resources will be researched, tested and used outside the Movement as well as potentially by NSs to help them to incorporate supervision as an essential component of mental health and psychosocial support programming. The current testing phase of the project includes the Ukraine Red Cross (piloted in 2021) and a National Society in the Asia-Pacific region in 2022, along with inter-agency partners in other locations (e.g., Save the Children Afghanistan, IMC in Jordan, UNICEF in Nigeria). Although the project and research is still ongoing, initial guidance is already available on the PS Centre website.

*Refuge-Ed:* The PS Centre is one of nine partners (including the Trinity Centre for Global Mental Health) in the EU Horizon-funded Refuge-Ed project, which is about co-creating and scaling up ways of supporting education, wellbeing and a sense of belonging for refugee children, unaccompanied minors and their host communities in Europe. The PS Centre is responsible within this project for developing the Brokering Knowledge Platform and the Community of Practice and Learning.
